

**MediGence™**

Enabling Better Healthcare Decisions

## MediGence Overview

We embarked on this journey in 2016 to bridge the gap in the healthcare industry and provide patients with a single, unique, and seamless platform for all their medical needs. We began as a 'Travel for treatment' discovery platform and eventually extended and expanded our services to deliver the best rehabilitation, virtual care and expert opinion service to the world population. Our goal has always been to improve the access to the best healthcare.

We uphold TEMOS certification and follow HIPAA and GDPR compliances. Following our brand statement **‘Enabling better Healthcare Decisions’**, MediGence continues to improve the healthcare outcome by the use of its technology and global network of providers and care experts.

## MEDIGENCE REHABILITATION SERVICES

Enhancing quality of life through  
holistic rehabilitation

We realize the importance of delivering the right rehabilitation care after surgical intervention and even for conditions which are chronic in nature such as Parkinson.

Our rehabilitation program is designed by clinical experts with decades of experience which are outcome driven and ensures that the patient is on the right road to recovery post any kind of debilitating disease which compromises quality of life. The sole aim is to make the patient live a dignified and independent life as much as possible. We strive to make adaptability to community living accessible and achievable.

## SOME OF THE HIGHLIGHTS OF OUR REHABILITATION PROGRAM

- Comprehensive evidence based rehabilitation protocols for:
  - Physical therapy
  - Speech therapy
  - Cognitive behavioural therapy
  - Occupational therapy
- Customized program in accordance of the patient's condition and severity of symptoms
- Network of over 100+ top and the most qualified rehabilitation experts on board
- Hybrid model for the delivery of care services in person or virtually on our proprietary Tele-Rehab platform
- Over 1000 patients treated for several acute conditions and symptoms
- Outcome based program designed for patients to show significant improvement in their symptoms and condition

- **Session with the Nutritionist expert** to help in draw the right diet plan to improve the immunity and better the recovery
- **Counselling Sessions with the Wellness experts** to help you think positive and feel stronger
- **Progress tracking and change in protocol** if needed. All in all for the right outcome.
